Summary

Passionate Computer Science student with a solid foundation in **programming, data structures, algorithms, and problem solving**. Experienced in **frontend web development and UI implementation**, with real-world projects such as a **real-time phishing detection browser extension** and an **AI-powered resume analyzer**. Skilled in **Python, C++ , and JavaScript**, with hands-on experience through **academic and project-based learning**. Looking to apply my technical skills and creativity to **real-world software development challenges**.

Technical Skills

Programming Languages: Python, C++ , JavaScript

Web Technologies & Frameworks : HTML, Tailwind CSS, React.js (basic), Node.js (basic), Express.js (basic)

Tools & Technologies: VS Code, Git, GitHub, Linux, Firebase, MongoDB, Wireshark, Nmap

Experience

Virtual Internship – Full Stack Web Development (MERN), Edunet Foundation | EY GDS | Feb 2025 – Mar 2025
AICTE

- Gained **basic hands-on exposure to the MERN stack** through guided learning and project-based tasks.
- Worked on **frontend development using React.js** and explored backend concepts with **Node.js and Express.js**.
- Actively participated in **weekly milestones, mentorship sessions, and masterclasses**.

Projects

Real-Time Phishing Detection Browser Extension | *Python, Random Forest, API Integration* GitHub

- Developed a browser extension that detects phishing websites in real time using a **Random Forest model and security APIs**.
- Integrated Google Safe Browsing and VirusTotal APIs, with fallback detection using a 15k+ URL Kaggle dataset.
- Implemented real-time alerts to warn users about suspicious websites.

AI Resume Analyzer Web Application | *Python, Flask* GitHub

- Created a web app that lets users upload resumes and instantly get clear insights using basic text processing techniques .
- Implemented **ATS score calculation** and job description matching to evaluate resume-job alignment.
- Supported multiple file formats with real-time feedback, ensuring compatibility and usability.

Network Vulnerability Scanner | *Python, Nmap, Streamlit* GitHub

- Built a Network Vulnerability Scanner using Streamlit and Nmap for real-time scanning of open ports and vulnerabilities.
- Integrated **Nmap NSE scripts** to detect vulnerabilities in FTP, SMB, and MySQL services.
- Designed a user-friendly interface with dynamic progress tracking and exportable scan results.

Education

SRM University, Ramapuram 2022 – 2026
B.Tech in Computer Science Engineering (Cyber Security)
Current CGPA: 8.92

Courses

- Cyber Security and Privacy – NPTEL
- Python Fundamentals – Infosys Springboard

Volunteering

- Assisted in organizing for **“Brand Artistry” at SRM Texus 2024**, facilitating poster and logo design challenges while ensuring smooth event execution.
- As part of **CHiPSET Club at SRM**, helped organize **“Hello Hackers V9.0”**, an ethical hacking workshop featuring live demonstrations and cybersecurity awareness sessions with over 150+ participants.
